NAGYLYENGEL OILFIELDS

25X1

1. The oilfields at NAGYLYENGEL are nearing exhaustion. An over-rapid rate of extraction in earlier years as well as the present lack of high-powered air-compressors, are both believed to be major causes of this.
2. Oil from NAGYLYENGEL is not good oil. It contains only 30% of straight-run fractions.
3. It is, however, used for making high-class bitumen which the Hungarians are anxious to sell abroad. Although the plant is ready, production is halted by the lack of suitable containers.
